Inventory System User Guide

1. Dashboard Overview.

The Dashboard is your central hub. Monitor Inventory health, track locations, and see low-stock alerts. Features include Sidebar Navigation, Inventory Table, and quick Action Buttons.

2. Stock Movements.

Use the Stock Inward and Outward modals to record supplies.

Inward: Select an item and enter quantity received.

Outward: Enter the quantity consumed and reason.

3. Transfers & Import

Transfer Stock:

Move items between branches and blocks. Note that branch transfers require admin approval.

transfer

Bulk Import:

Upload an Excel file for massive initial setups.

import

4. Admin Controls

Requests Panel: Admins must approve pending transfers and item deletions here.

Branches Panel: Manage and configure location blocks (wards/rooms) for each branch.
