PRODUCT OVERVIEW

Welcome to Version 2.0!

The MSC Trust Inventory Management System is a comprehensive web-based application designed exclusively for the MSC Chellamuthu Trust & Research Foundation.

Intended Use

This software is intended to track, manage, and audit physical inventory items across various branches and specific blocks (e.g., rooms or wards). It allows staff to record inward and outward stock movements, perform transfers, and request item deletions, while allowing administrators to maintain global oversight.

Safety & Security

Never share your login credentials. Actions performed in the system are audited and tied to your user account. Do not leave the application open on unattended computers.

MAIN DASHBOARD

Your centralized hub for inventory health, alerts, and locations.

Dashboard Key Elements:

- 1. Sidebar Navigation:** Located on the left, allows access to Dashboard, Requests, Categories, Programs, and Admin Settings.
- 2. Location Tracking:** The central grid shows Item Names, Location (Branch/Block), Item Code, Serial No., and current Stock Levels.
- 3. Summary Cards:** At the top, displaying Total Items, Available Stock, and Low Stock Alerts.

OPERATING INSTRUCTIONS

Recording Stock Inward & Outward

When new supplies arrive at your branch, they must be recorded into the system to maintain accurate stock levels.

1. Navigate to the Dashboard and click the **Stock Inward** button.
2. Use the **Select an Item** dropdown to choose the product.
3. The system will automatically populate the **Item Code** and **Serial No.**
4. Enter the quantity received and click Save.

Branch & Block Transfers

Items can be moved between Blocks within your Branch, or sent to an entirely different Branch.

1. Click the Transfer Stock button.
2. Select the origin branch and item.
3. Select the destination branch and specific destination block.
4. Confirm. Note: Transfers to a different branch require Admin approval via the Requests panel.

TROUBLESHOOTING

Problem: I cannot see inventory for other branches.

Solution: Standard Staff accounts are restricted to viewing only their assigned branch. Contact an Administrator for multi-branch access.

Problem: The 'Select an Item' dropdown in the Stock Inward modal is empty.

Solution: Ensure that items have been created in the system and assigned to your branch first using the 'Add Item' function.

CONTACT & SUPPORT
